

- Not only biodegradable, these Eco-Cleaners contain live microbes which break down wastes and feed the soil.

- Our range of Bio-Fertilisers boosts the microbial activity of the soil and unlocks nutrients making them readily available.

- Our innovative inoculation techniques are patented in Australia and overseas.

YIELD MANAGEMENT & DISEASE SUPPRESSION PROGRAM

These programs are to be used in conjunction with a normal fertiliser program.

PLANT CROP:

INITIAL APPLICATION

Product	Litres/Acre	Litres/Hectare
Bio Start +	2	5
Agri Seed	2	5
Cal-Booster	6	15

3 MONTHLY PROGRAM (Foliar)

Product	Litres/Acre	Litres/Hectare
Cal-Booster	6	15
Fung Shoo	6	15

FLAG POINTS:

1. Before planting: Consider soil sample. Watch for plant overall health and consider application of trace elements. (Boron, Zinc, Manganese, Copper)
2. **January/February** – WET SEASON: In wet conditions irrigation may not be possible. Consider additional early application
3. **March/April** – As soon as conditions are dry enough consider soil sample and top up of trace elements and identified shortages
4. **June** – COLD PERIODS: Consider additional Phosphate if weather stays cold more than 2 weeks
